A Euroluce, Zafferano presenta le novità 2023 dei propri marchi di illuminazione.

Zafferano Lampes-à-porter arricchisce la propria ampia e differenziata gamma di lampade portatili e ricaricabili con **SuperO** (design Studio Kairos), elegante sistema di illuminazione composto da un modulo luminoso e dagli accessori che lo trasformano in lampada da parete, a sospensione e da terra/tavolo.

Le novità di **Zafferano Ailati Lights** sono invece accomunate dal know-how della lavorazione del vetro e da un preciso orientamento alla funzionalità coniugata all'estetica:

Sfera & Sfer'Otto (design Federico de Majo) e **Baby / Bilia** (design Nava + Arosio) sono sospensioni a LED con diffusori in borosilicato pensate anche per uso modulare che creano interessanti effetti visivi e luminosi.

At Euroluce in Milan, Zafferano is pleased to introduce its 2023 lighting novelties.

Zafferano Lampes-à-porter enriches its wide and differentiated range of portable and rechargeable lamps with **SuperO** (design Studio Kairos), an elegant lighting system composed of a light module whose accessories transform it into a wall, suspension, and floor/table lamp.

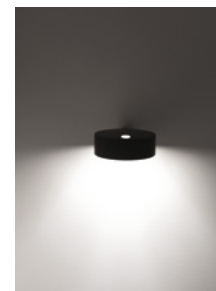

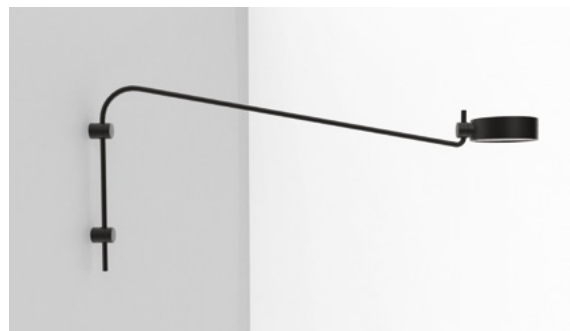

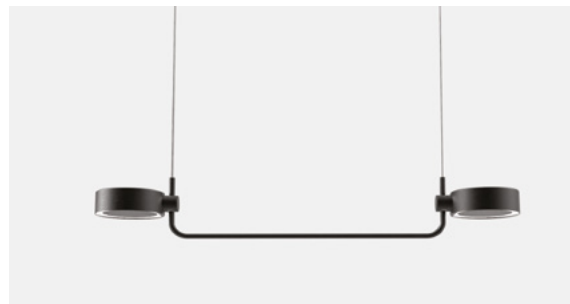

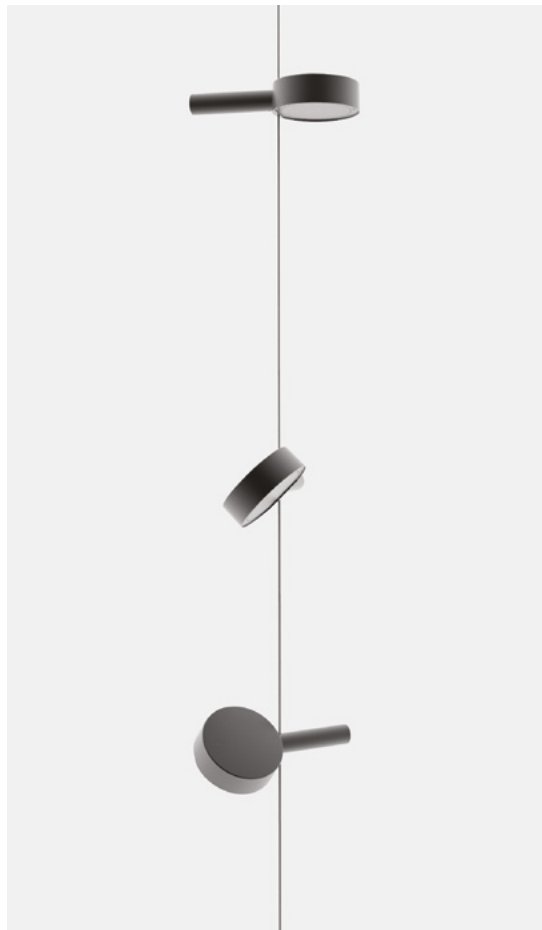

Zafferano Ailati Lights novelties feature glassmaking know-how and a precise focus on functionality and aesthetic appeal: **Sfera & Sfer'Otto** (design Federico de Majo) and **Baby / Bilia** (design Nava + Arosio) are LED suspension lamps with borosilicate diffusers that can be juxtaposed, creating interesting visual and lighting effects.
